AVID Technical Resources Named One of the Fastest Growing Tech Companies in the US by Lead411 *Lead411 Technology 500 Fastest Growing Tech Companies in 2010*

BOSTON, Dec. 7, 2010 /PRNewswire/ -- Lead411 has named AVID Technical Resources to their Technology 500 list of fastest growing tech companies in the US. With over 1,000 company applicants, Lead411 narrowed the list down to the top [500 tech companies](#). The rankings were derived by calculating the highest percentage revenue growth from the year 2007 to the year 2009. To qualify all companies must be a United States private company that earned over \$1M in revenues in the year 2009.

"We're honored to be named to the Lead411 list of fastest growing companies in the country," says Principal Owner, Brian Tomasello. "This has been another strong year for our company, another year of growth. We don't focus or dwell on market conditions. We can't control any of that. What we can control is our work ethic. The awards keep coming in as a result of the hard work and dedication of our entire team."

AVID (Applications, Voice, Internet, Data) Technical Resources is a contract and permanent IT recruiting company. Headquartered in Boston, AVID specializes in placing information technology professionals with either an [Infrastructure Support](#) or [Applications Development](#) background.

Since the company's inception in 2003, AVID has grown to be among the [leading IT recruiting firms](#) in the area. This explosive growth has led to a number of awards and recognition. This past summer, AVID was named to Inc. Magazine's 500/5000 list of fastest growing companies in the nation. Prior to that, Staffing Industry Analysis named AVID to their list of the fastest growing companies in the US as well.

During the recent economic downturn, AVID has posted consecutive profits over the past two years and grown over 20%. The company recently announced the opening of two additional offices in Providence, RI and Phoenix, AZ.
